CALIBRATION

The unit is to be calibrated to standards maintained at the Auto-Mate Technologies test lab to allow for the finest precision. **Calibration includes Certificate of Calibration.** Unit should be re-calibrated every 12 months or more often depending on use. Refer to the calibration label on the unit for the calibration due date. It is recommended batteries be changed every 6 months.

New batteries and UPS shipping charges are additional. Prices quoted are per each unit and do not include any repairs.
